**RECOMMENDATIONS**

Product #	Fabric Color	Hot Peel	Warm Peel	Cold Peel	Hand Iron
9710P0	Mugs/Tiles			✓	✗

**PRINTING INSTRUCTIONS FOR ALL SUBSTRATES:**

1. Print image reversed/mirrored format.
2. Cut paper to fit substrate.

**TRANSFERRING INSTRUCTIONS:**

**MUG INSTRUCTIONS**

1. Place the printed image on top of the mug (imaged side toward the mug).
2. Press: **2 minutes** at **250°F**.
3. Remove mug from press carefully and run under **cold** water to peel the paper backing.
4. The mug should be placed in an oven for 10 minutes at 275°F to glaze the toner which will prevent 'flaking'.

**MAGNETS, METALS & LICENSE PLATES INSTRUCTIONS**

**("A" pad is required)**

1. Place entire transfer sheet over the product. (Place a piece of plain paper under the product to assist in picking it up while it is still hot, and to protect the lower platen from overlapping toner).
2. Place the "A" pad on top of the transfer and press for **3 minutes** at **230°F** with **medium pressure**.
3. Remove mug from press carefully and run under **cold** water. Remove paper after cooling.

**CUBES**  
**("A" pad is required)**

1. Place toner side of transfer onto side of cube.
2. Press: **2 minutes at 350°F** with **medium pressure** using an "A" pad. *You may need to insert more paper or a block under the cube in the press to make sure that the cube top surface is higher than the edges of the press.*
3. Let cool for 1 minute and peel.
